

Managed cybersecurity cloud service provider

**15+ years**  
of experience

**3,5 years+**  
average client lifetime

**1000+**  
active clients worldwide

## Qrator Labs delivers

Proactive  
Cybersecurity Posture

Continuous availability  
of clients' resources

Cost Savings on Recovery  
and Mitigation

### Qrator WAF

Web applications and  
API protection against  
hacking attempts  
(WAAP)

### Qrator AntiBot

Protection of web  
resources from  
malicious activity  
of Internet bots

### Qrator AntiDDoS

Continuous resources  
availability and DDoS  
mitigation service

### Qrator Radar

Unique global  
monitoring system for  
detection of BGP and  
routing anomalies

### Qrator SecureDNS

Distributed reliable  
cloud DNS  
infrastructure

Qrator Labs solutions are most  
in demand in such verticals as:

- FinTech and banking
- E-commerce and retail
- iGaming and betting
- Online entertainment & media
- PropTech

Advanced Machine learning algorithms and ongoing R&D

Own AnyCast globally distributed infrastructure

Max SLA up to 99.95% or full money back (guaranteed by the contract)

Professional technical support with guaranteed response time up to 15-minutes

## Qrator Labs service benefits

- Transparent **pricing**: pricing depends on traffic speed, with **no additional hidden fees** or cost increases for customization or additional features
- Qrator.AntiDDoS automatic protection: managed always-on **automatic protection with high-quality filtering**, including ZERO-day attacks, eliminating manual configuration needs and client's internal expertise
- **Easy to connect**: any web infrastructure may be protected **within 15 minutes**
- Qrator.AntiDDoS **L7 filtering & user experience**: qrator offers L7 filtering in all plans, avoids branded loading wheels under attack, and refrains from using CAPTCHAs. Using smart-blocking including blocking from report request
- Qrator.AntiDDoS **encrypted traffic filtering**: HTTPS filtration with no key disclosure
- Qrator.AntiDDoS fastest preventive protection **response time: less than 1 second**
- High quality of traffic deliverability: Qrator network connected to backbone transcontinental **Tier 1 ISPs only**. No connections with regional operators and free IX
- Specialized **filtering network with big capacity** - easy to manage, no risk of traffic leakage
- Transparent escalation system - **availability of manage questions** at all company levels - from tech support to general manager
- Customization: allocated team of solution architects to **adjust solution to individual client's** architecture and special needs
- Advanced **technical support** at all tariff plans with guaranteed response time
- Customized **SLA**: up to **99.95%** guaranteed by the contract
- Qrator.AntiDDoS **smart blocking system**: specialized ML algorithms to block a malicious traffic on request or IP level with ability to block from the first request
